

Career Fair Schedule 2015

Ashcroft often has opportunities for internships and co-ops in many areas of interest at our Stratford, CT headquarters. Most recently our opportunities are for Electrical or Mechanical Engineering students. Co-op opportunities are typically 40 hours per week from June to December. Internships are 20-40 hours per week typically from May to August.

We also actively recruit individuals for hourly manufacturing positions in our ISO-9001 certified facility. These positions may include: General assembly, shipping and receiving, electronic parts assembly and calibration, and welding.

Check back often as we continually schedule Career Fairs throughout the year.

To apply for opportunities, please go to: www.ashcroft.com/careers
